- Certified Aeronautical Material
- High durable

**NAD 405.00 excl. VAT**

Up to 5 times reusable at  
nonmedical purposes

## Common Isolation Coverall

- Protective coverall
- Melt Blown Nonwoven Fabric
- High durable
- 180gsm

**NAD 349.00 excl. VAT**

## The Overview of Melt-blown Fabrics

N 95+ **pp meltblown non woven cloth** which is made from **meltblown fabric** or **meltblown nonwoven fabric** is mainly used for medical industries. The commonly used weight is 30g/sm-60g/sm.and can meet US standard NIOSH 42 CFR 84.

**pp melt-blown nonwoven fabric** can effectively block the spread of bacteria. It avoids cross-infection among people and the spread of various bacteria in different seasons. It can also effectively prevent pollen allergy and reduce the harm of harmful objects to the human body. It is favored by doctors, nurses and other medical workers.

## 50gsm Surgical Gowns

- Weight 50gsm Non-Woven Spunbond
- 50mm Knitted cuffs
- Sizes: S, M, L, XL and XXL
- Resistant to moisture & bacterial penetration
- Latex Free / Toxic Free
- Breathable characteristics
- Puncture, tearing and abrasion resistance
- Waterproof Gowns - barrier against liquids
- Maintains body temperature
- Single use
